

CompQ

So quiet, you'll be *BLOWN AWAY*

Kice never stops innovating, so our new air power unit should come as no surprise. It's just surprisingly quieter. The **CompQ** offers a smaller footprint and less noise than our previous APU.

Featuring our **proven PD series blower**, the CompQ serves a wide range of applications: positive and negative pressure conveying systems, fluidization systems, vacuum sweeper systems, filter systems, and more.

HEAR THE DIFFERENCE

- Noise-reduction of 20 decibels for a safer operational environment
- Compact and custom-designed to meet your facility's needs
- Sanitary, heavy-duty frames built for endurance
- Proven PD blower performance in extreme conditions
- Fully assembled and ready to operate
- **Coming soon:**
Built-in options including a 4-inch automation display and external oil level indicator

DISCOVER THE POWER OF AIR, REDESIGNED

Many companies build blower packages, but they don't compare to Kice. The CompQ APU delivers long-lasting durability backed by industry-leading expertise. Contact us to plan your upgrade today.
